THE SUMMIT SPECTRUM SYSTEM MAKES ASSEMBLING A PRODUCTION STRING FAST AND EASY

- Eliminates the hassle and headache of placing individual orders or running down missing parts. Every piece needed for a production string is included in the Spectrum package.
- No supply chain challenges. All Summit parts are proudly manufactured right here in the USA, no container ships required, so you can get what you need now!

THE SUMMIT SPECTRUM SYSTEM INCLUDES

- An option of Float Equipment or Integrated Shoe Track (IST), both with 10K or 15K valves
- SUREstart™ XP Toe Sleeve
- Summit Glass Flotation Sub
- Summit Latch-In Plugs – available in various configurations and sizes
- Summit Centralizers – available in a variety of styles, including hinged bow spring, solid steel body centralizer, composite, and one-piece slip-on bow centralizer

Other tools can be added to the package as needed. No more individual buying decisions or orders. No supply chain worries. With the **Spectrum System it's "One and Done!"** A single buying decision gets you everything you need to assemble a production string.

SUMMIT SPECTRUM SYSTEM

Integrated Shoe Track

Float Equipment

Latch-In Plugs

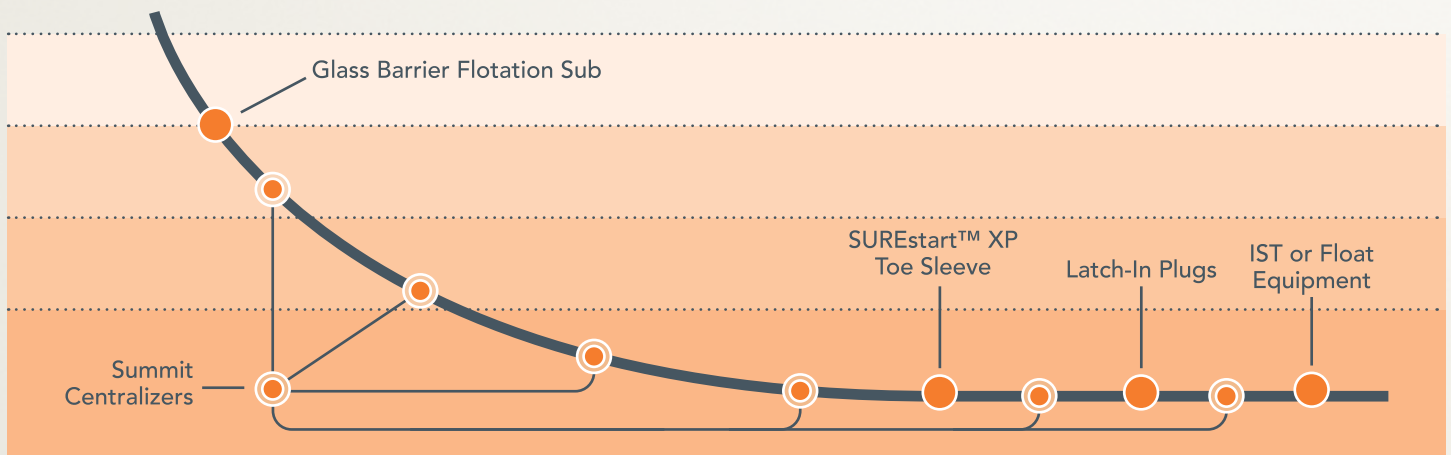

SUREstart™ XP Toe Sleeve

Glass Barrier Flotation Sub

Centralizers

● **An option of Float Equipment or Integrated Shoe Track (IST)**

- Provides 10,000 or 15,000 psi back-pressure with only one pipe connection in a one-piece shoe track less than seven feet in length
- IST reduces the length of the shoe track with only one casing connection
- Ability to match with different casing materials and threads
- Single or double High-Pressure float valve design ensures positive sealing in vertical, horizontal, and deviated wells with a special poppet design and protects valve spring
- IST can be supplied for casing sizes of 4-1/2" - 6.0", with larger casing sizes available by request and design

● **Summit SUREstart™ XP Toe Sleeve**

- Pressure actuated sliding sleeve design
- Compact for easy handling (no pup joints required)
- Internal piston is protected and hydraulically balanced to prevent premature activation
- Spring assisted piston and magnetic lock-open feature ensures valve fully opens and remains open
- Equipped with interchangeable burst disks, available in 500 psi (3.5 MPa) increments

● **Summit Latch-In Plugs**

- 6.5X wear resistance compared to industry competitors
- Lock ring capable of holding over 5,000 psi back pressure
- Available in single, dual or triple length
- Material selection enhances wiping efficiencies to eliminate cement stringers

● **Summit Glass Barrier Flotation Sub**

- High debris tolerance - no debris catcher or landing collar needed
- Not temperature dependent
- 100% traceability on all components
- Variety of casing sizes, grades, weights, and threads

● **Summit Centralizers**

Centralizers are a Summit specialty, available in a variety of styles:

- Hinged bow spring, for exceptional percentage standoff and restoring forces
- Solid steel body centralizer, with fully customizable features for any application need
- Composite, for low coefficient of friction
- One-piece slip-on bow centralizer, tested to API 10D specification to produce a robust centralizer for tackling casing buckling issues

When it's time to assemble another production string, it's time to order the Summit Spectrum System. **Just one call gets you everything you need.**

The logo for Summit Spectrum System. It features the word "SUMMIT" in dark blue, "SPECTRUM" in large orange letters, and "SYSTEM" in orange letters with wide spacing. The text is flanked by stylized blue and orange lines that resemble a spectrum or a production string.

ONE CALL, THAT'S ALL!

Get an entire production string with just
one call to Summit, for our new Spectrum System!
